- There is a good chance driving conditions will at times be affected by spray and standing water, leading to some minor journey delays
- Some short term loss of power and other services due to lightning strikes is possible
- Delays to train services are possible

### Further details

Heavy showers, which will become thundery in places, are expected to develop quite widely across parts of England and Wales later Friday morning and through the afternoon. A few places could receive 20-30 mm of rain within an hour. As is the nature of showers however, some places within the warning area will miss them altogether, and have a dry day.
